

Services *for* Architects

The briefing, planning and design of health buildings is a highly specialised field in which we are skilled and experienced.

We offer our knowledge and skills to practices who want to work in the health sector but have limited experience of it, and to specialist healthcare architects who are looking to supplement their existing resources.

We are flexible about our precise role, tailoring it to the needs of each project and the experience and preferences of individual practices. As healthcare planners and architects, we are skilled at relating to clients and users, and to the whole design team.

Services that we offer include:

- ◆ Development Control Planning
- ◆ Workshops for Clients and Users
- ◆ Operational Policies
- ◆ Briefing
- ◆ Schedules of Accommodation
- ◆ Departmental Layouts
- ◆ Detailed Room Requirements
- ◆ Design Reviews
- ◆ Expertise in Therapeutic Environments, Consumer and Infection Control issues
- ◆ In-house Seminars for Architects

Please visit our Projects to view our services in action.
